Chiropractic Care – Informed Consent

I hereby request and consent to the performance of chiropractic adjustments and other chiropractic procedures. I understand and am informed that, as in the practice of medicine, in the practice of chiropractic there are some risks to treatment. The most common side-effects are of short duration and include local discomfort in the area of treatment, pain, and headache. Most adverse events associated with spinal manipulation are benign and self-limiting. The incidence of severe complications (including but not limited to stroke) following chiropractic care and manipulation is extremely low. The best evidence suggests that chiropractic care is a useful therapy for subjects with neck or low-back pain for which the risks of serious adverse events should be considered negligible (JMPT, 2008 Jul-Aug;31(6):461-4).
